

PLEASE, do not let BellSouth squash the small ISPs by passing this regulatory item. The smaller ISPs provide critical services to medium sized internet business, who are staples in rebuilding the Silicon Valley's financial infrastructure. If there is anyone out there who was hurt by the tech-bubble burst/stock market crash you know how important this community is to all of our well beings. Stand up, and protect our economy. Stop BellSouth.

Thanks from a business leader, and fellow American.
